KABADDI Tournament

M.K University D Zone

15-10-2024 & 16-10-2024

The Madurai Kamaraj University 'D' Zone Kabaddi Tournament for the academic year 2024 – 2025 was held at Sri Krishnasamy Arts and Science College, Mettamalai, Sattur on 15/10/24 & 16/10/24. It was inaugurated by Shri.K.Raju, Chairman, Thiru.R.Muthukumar, Secretary, Dr.R.Ushadevi, Principal of the College in presence of Dr.T.Murugesan, The Convener of MKU 'D' Zone Physical Director of VHNSN College, Virudhunagar. Nearly 20 Teams participated in the Tournament. In the Valedictory ceremony, the Dignitaries Shri.K.Raju, Chairman, Thiru.R.Muthukumar, Secretary and Dr.R.Ushadevi, Principal, Dr.T.Murugesan, The Convener of MKU 'D' Zone distributed the winning Trophies to the winners and runners. The winner was Rajapalayam Rajus College, Rajapalayam, the runner was VHNSN College, Virudhunagar. The Tournament was organized by the Physical director Mr.J.Gokul Krishnan, Mr.K.Premkumar and Mr.M.Sriram.

The State Level Kabaddi Open Tournament was held at Sri Krishnasamy Arts and Science College, Mettamalai on 26/10/2024. It was inaugurated by Shri.K.Raju, Chairman, Thiru.R.Muthukumar, Secretary and Dr.R.Ushadevi, Principal of the College. The Chief Guests were Rtn.T.Karnan, President, Rotary Club of Sivakasi, Rtn.PAG.C.S.Baskaran, Secretary, Rotary Club of Sivakasi, they started the Tournament by delivering a Keynote address. More than 25 Teams including both Boys and Girls participated in the Tournament. In the Valedictory Function, the Winning Trophies and Cash awards were distributed for the respective teams. For Boys team, First Prize Rs.8000/- cash award with trophy was won by TNPMMN Higher Secondary School, Thalavaipuram, Second Prize Rs.6000/- cash award with trophy was won by Govt.Higher Secondary School, Chinnakamanpatti, , Third Prize Rs: 2000/- cash award was won by Govt. Higher Secondary School, Vembakottai,Fourth Prize Rs: 2000/- cash award was won by Govt. Higher Secondary School, Mallanginaru. For Girls team, First Prize Rs.5000/- cash award with trophy was won by R.C Higher Secondary School,Meenachipuram, Second Prize Rs.4000/- cash award with trophy was won by Mangapuram Hindu Higher Secondary School, Srivilliputhur,Third Prize Rs: 1500/- cash award was won by Govt. School, Kovilpatti,Fourth Prize Rs: 1500/- cash award was won by S.S.H.N Higher Secondary School, Muhavur, The best Raider for Boys was won by M. DineshKarthick , Govt. Higher Secondary School, Vembakottai-Trophy,The best Raider for Girls was won by Mariselvi, R.C Higher Secondary School, Menachipuram-Trophy.The best Defender for Boys was won by M.HenishGanapathi, TNPMMN Higher Secondary School, Thalavaipuram -Trophy, The best Defender for Girls was won by Akila, Mangapuram Hindu Higher Secondary School, Srivilliputhur-Trophy.The Dignitaries distributed the prizes to all the winners. The Tournament was organized by the Physical director Mr.J.Gokul Krishnan, Mr.K.Prem Kumar and Mr.M.Sriram.

HERCULES English Literary Association hosted One day Guest Lecture in the presence of Principal Dr. R. Ushadevi on 8/10/2024. The topic of the guest lecture was on “Language and Culture”. The session was led by Mr. G. Vadivelmurugan - soft skill trainer, who provided students with valuable information and its usage in the competitive world.

1. Presented a paper in one day State Level Seminar on “Research Methodology: Tools and Techniques for Budding Researchers” held on 10.10.2024 organized by C.S.I Thoothukudi - Nazareth Diocese POPE’S COLLEGE, Thoothukudi.

சேவாரத்னா விருது என்ற அமைப்பில் இருந்து தமிழ்த்துறை உதவிப்பேராசிரியர் திருமதி ஈ.மகாலட்சுமி அவர்களுக்கு “வித்யாரத்னா” என்ற விருதும் கவிதை வாசித்து அளித்தமைக்கு “கவிச் செம்மல்” என்ற விருதும் வழங்கப்பட்டது.

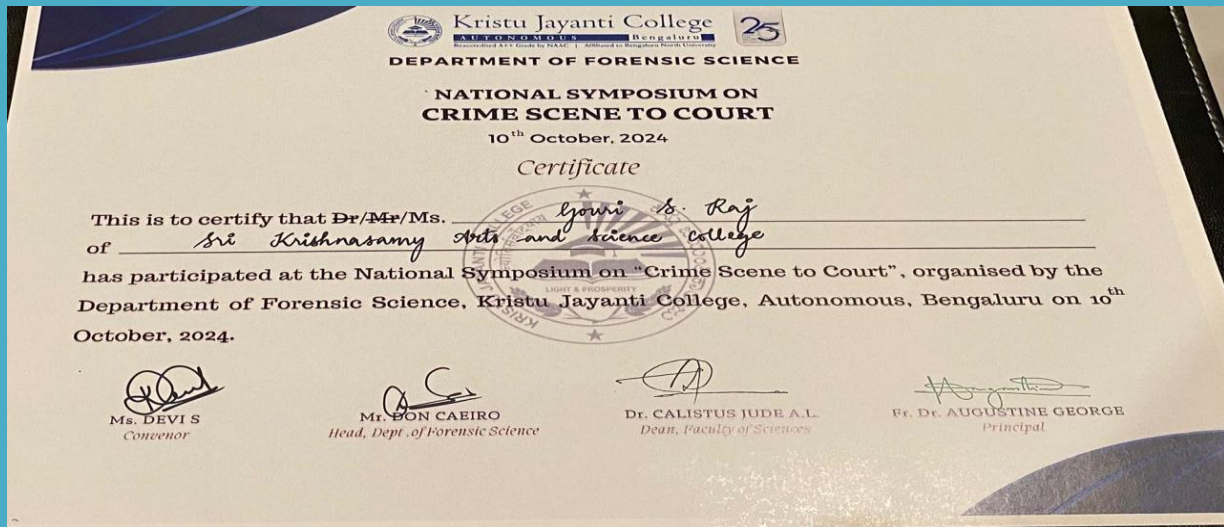

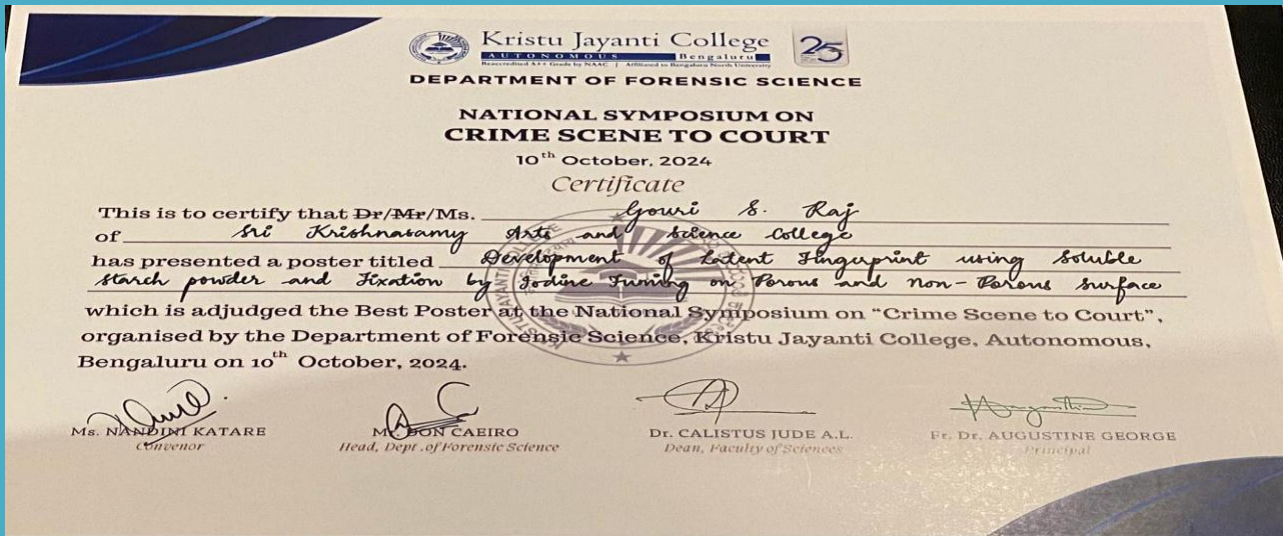

தமிழ்த்துறை உதவிப் பேராசிரியர் முனைவர் போ.சக்தி ஜோதி 22.10.2024 அன்று மதுரை காமராசர் பல்கலைக்கழகத்தில் தனது முனைவர் பட்ட ஆய்விற்கான பட்டம் பெற்றார்.

Ms.Anjitha C.G, Hod in-charge, Assistant professor & Ms. Gouri.S.Raj, Assistant professor of department of forensic science had participated in a 6 days training programme on “Audio forensic” organized by Chandra forensic science laboratory, Chandigarh.

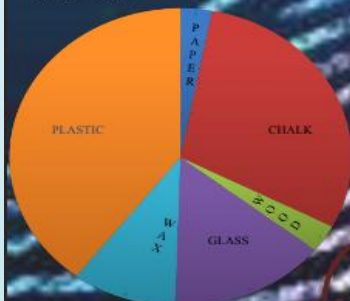

Ms.Anjitha C.G & Ms. Gouri.S.Raj got first prize in research paper poster presentation in National symposium on "crime scene to court" on the topic "Development of latent fingerprints by soluble starch powder and fixation by iodine fuming" conducted at Kristu Jayanthi college, Bangalore on 10th October 2024.

AFFILIATIONS

Sri Krishnasamy Arts and
Science College, Affiliated
to Madurai Kamaraj
University

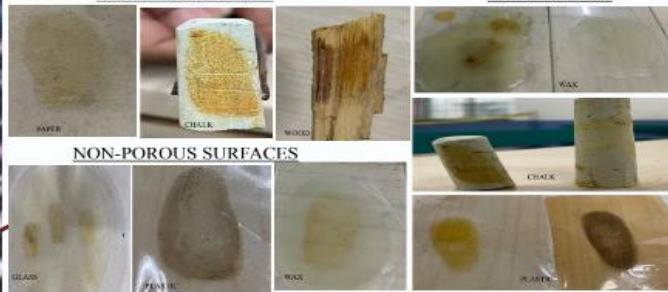

The result of this study underlines the use of soluble starch powder for the development of latent fingerprints and fixation of the prints by iodine fuming method on various porous and non-porous surfaces. The method works well on both porous and non-porous surfaces. In total, there were 180 samples of latent print, 30 samples of each of the 6 surfaces. The results of the study are as follows and was: The starch powder reacts with the fat and oil residues in the fingerprint and it is a good method other than the conventional powders used for latent fingerprint development. It is easily accessible and affordable also. The starch powders then reacted with the iodine fumes and the prints were developed. The prints were very well. As compared to other surfaces, on plastic surface the prints developed clearly and effectively using this method. In normal iodine fuming technique, the developed prints will start fading after few minutes. But in this technique, if the prints are fixed with the iodine fumes, the prints will not fade. The developed prints remained for a long period of time.

The ridges and furrows on the skin of the fingers create distinctive patterns known as fingerprints. A novel method of creating latent fingerprints on starch powders, especially when paired with iodine fuming. Particles of starch stick to the residues and oils left by fingerprints, making them stand out more against the background. Iodine reacts with starch and fingerprint residues to produce a visible stain when starch-coated prints are exposed to iodine vapours. It is a versatile solution for a range of forensic situations because it works well on both porous and non-porous surfaces. Through a comparison of fingerprint visibility and clarity across different substrates, we evaluate the efficiency of starch powder as a developing agent. The study emphasises the relationship between starch texture and development outcomes, as well as the relationship between starch powder and fingerprint retention.

To study the development of latent fingerprint using soluble starch powder and fixation by iodine fuming method and to compare its effectiveness on porous and non-porous surfaces.

COMPARISON

Materials required are;

- 1) Soluble Starch powder: It acts as a contrasting medium to visualise the latent fingerprints.
- 2) Iodine fuming chamber: For sublimation of Iodine
- 3) Iodine Crystals: For producing iodine vapour
- 4) Fingerprint brush: To powder the latent prints with starch powder
- 5) Porous and non-porous surfaces: Paper, chalk piece, Wood (porous), Plastic, Glass, Wax (Non-porous)

- In this comparative study, 30 samples each are taken from both porous surfaces like paper, chalk, wood, and non-porous surfaces like plastic, glass, wax. Only latent prints are taken for the study.
- Latent prints are dusted with soluble starch powder using fingerprint brush. As compared to other samples, on plastic surface the latent print developed clearly when dusted with starch powder.
- In order to fix the powder during the development, the developed prints are placed in iodine fuming chamber for the fixation of prints by iodine fuming.
- The samples are kept in the chamber simultaneously and is kept for about 30 minutes as the porous surfaces may require slightly longer exposure to ensure the iodine vapour interacts effectively with the starch.
- Non-porous surfaces may develop prints faster due to less absorption. Each print gets developed and fixed by iodine fuming.
- The developed prints on various surfaces are then analysed for their effectiveness, visibility and clarity on different surfaces.

The findings of this comparative study shows that the use of starch powder in conjunction with iodine fuming greatly improves the ability to detect latent prints on a different substrate both porous and non-porous, offering a practical alternative for forensic purposes. This method shows an improvement in the fixation of preservation of developed prints after iodine fuming. When the prints are dusted with starch powder and then it is exposed to iodine vapours, the prints will last for a longer period of time than the conventional iodine fuming method. And also, this study focused on the comparison of the effectiveness of this technique on both porous and non-porous surface. The method worked well on plastic surface when compared to other porous and non-porous surfaces taken for the study.
